DUPLICATION SYSTEMS

FLASH DUPLICATORS

U-Reach's range of digital duplication systems make copying any form of digital media affordable, fast, effective and reliable.

The U-Reach range of Flash Media Duplicators are stand alone units, meaning there is no PC required or complicated set up procedures. All you need to do is turn the machine on, insert the source media, insert the target media and then press copy! This is a high speed, super efficient, user friendly professional duplication system designed for industry and creators of digital media needing to duplicate the content quickly, easily and accurately. It is the only duplicator in the world which duplicates at 33mb/second, our only competitor manages a paltry 12mb/second at best.

As well as duplicate media at speeds of 33mb/second. It also can accurately check the quality and genuine capacity of the target media in an instant. It will safely erase media to standards which meet government requirements.

U-Reach duplicators support NTFS in 'data only mode' meaning that they can copy only the data on a disk opposed to the whole disk. Consider a 2TB hard drive with a 20GB data section, the U-Reach duplicator will finish it in 11 minutes while our competitor will take a whopping 55 hours!

KEY SELLING POINTS

Heavy duty construction for every day use in industry

Stand alone units, simply plug into the mains power supply

No PC required

Instant start

No risk of virus

No risk of wrong files being selected

Simple to use - VERY USER FRIENDLY

Anyone can copy without training or specialist software - TOTALLY INTUITIVE

FAST! - each port is an independent channel - 33mb/second

Asynchronous copying - each channel functions independently

Can copy at 2GB per minute per port

High speed comparison function - bit to bit at 33mb/second

Quick format function (FAT16, FAT32, NTFS, Linux(Ext2/3))

Capacity check function

Media speed measurement function

Takes 2 seconds to determine fake flash modules! (speed and capacity)

Real time display of status

Erase functionality

Large memory (DDRII) buffer of 256MB

Incredible simple 4 key Control

U-Reach duplicators have perfect compatibility with every brand of flash on the market

No limit on size of Media from 64gb flash device right up to 3TB USB Hard Drive

Can Copy USB3.0 Flash

WHO ARE THE USERS?

There are so many uses for the U-Reach range of duplicators - DATA, VIDEO, AUDIO, SOFTWARE Controlled Distribution.

Heavy users come from the legal distribution sector, making multiple copies of evidence for the prosecution, defence and archiving. Marketing companies can distribute detailed product or company information. Religious markets are a key user with copies of sermons, lectures and special services being widely distributed both here and all across the world. Industry is an important user with companies like CBS Media using Compact Flash to update their electronic advertising hoardings on the London Underground.

A chain of bakeries use the Compact Flash Duplicator to update their electronic cash registers. An airline uses the SD Card duplicator to update their weekly on-board entertainment content. A FTSE100 company uses the USB Duplicator to distribute copies of their core meetings to relevant personnel.

Other users include Engineering, Education, Government, Medical, Field Sales Support, Independent Software Publishers & Telecoms companies. U-Reach duplicators simply saves time, money and does the job correctly and accurately.
