LIGHTSCRIBE TOWERS

Burn LightScribe CD-Rs, DVD+Rs, or DVD-Rs one at a time or by the hundreds with the CopyWriter LightScribe Tower Duplicators. Burn CDs at 48X and DVDs at 22X. When the job completes, turn the discs over and print ten labels all at once with LightScribe's laser-etching technology by HP. Never worry about purchasing ink or ribbon again! A built-in 250 GB hard drive allows you to store multiple master disc images and label designs, or extract audio tracks and mix your own discs. The intuitive 8-button panel and multi-line display make copying discs easy for the novice user while keeping all the high-end, power-user features.

chained together.

LIGHTSCRIBE MEDIA

Microboards LightScribe Media

Available in CD-R, DVD-R, and DVD+R

After recording content on a Microboards LightScribe media, simply flip the disc over and put it back in the drive to burn a custom disc design directly on the disc's label-side surface. No expensive equipment to print with, no sticky labels or stinky black markers - just a professional looking disc with your custom label etched on top.
